

(a) Variant Shedlovsky and MSA models prediction of the uncalibrated conductivity data

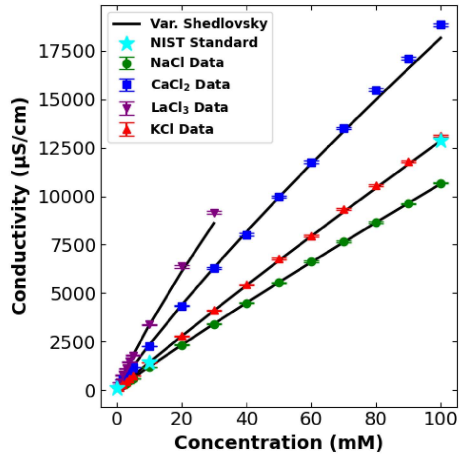

(b) Percent error of the uncalibrated conductivity data

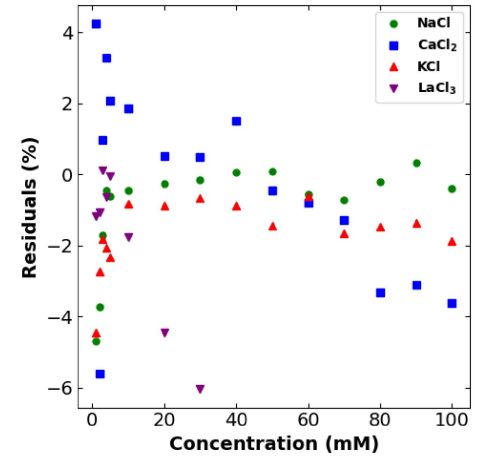

(c) MSA model prediction of the calibrated conductivity data

(d) Percent error of the MSA model

(e) Variant Shedlovsky model prediction of the calibrated conductivity data

(f) Percent error of the variant Shedlovsky model

Figure 1: Comparison of the variant Shedlovsky and MSA models in single-salt solutions
